• Type-C to USB Hub with Gigabit Ethernet - Black
• User's guide

System Requirements

- Windows® or Mac® systems with an available USB Type-C port

Product Layout

USB 3.0 ports (x2)
RJ45 Ethernet Port

USB Type-C

Figure 1: Type-C to USB Hub with Gigabit Ethernet - Black

- **USB Type-C**: Connects to your system's USB Type-C port
- **USB 3.0 ports (x2)**: Connects to USB peripherals such as mice, pen drives, or printers. * Note: It's NOT recommended to connect two external hard drives simultaneously
- **RJ45 Ethernet Port**: Wired Gigabit Ethernet

Windows Installation

Windows has built-in driver support for this adapter. Simply plug in the adapter and the driver will load automatically.

Windows Verification (for LAN)

1. Right click **Computer** or **This PC** on the desktop, and select **Manage**.
2. Select **Device Manager** then expand **Network adapters** section.
3. **Realtek USB GbE Family Controller** should be displayed.

Figure 2

Mac OS Installation

1. Insert this adapter to an available USB Type-C port. Mac OS has built-in driver and will load automatically.
2. The Gigabit Ethernet interface requires an additional driver to maximize its capability. Connect an Ethernet cable to this adapter and go to **gofanco.com** to download the latest Ethernet driver.
3. Enter part# **USBCLANHub** in the search box to find this product, select it, then click **Downloads** tab and download the appropriate driver for your OS.
4. Run it and follow the on-screen steps to update the driver.
5. After restarting, the adapter is ready for use now.

Mac OS Verification (for LAN)

1. Click on the left-top corner of the taskbar and choose **About This Mac**.
2. Choose **System Report...**, and expand **USB** section (under Hardware).
3. **USB 10/100/1000 LAN** should be displayed in the list.
